Website Integration Notes — for Plasmaberry's website developer

- Connect the HTML form to a secure server-side endpoint or CRM. The delivered HTML is a front-end template and does not transmit or store submissions until connected.
- Route applications to the designated Plasmaberry team and/or CRM; send a confirmation to the applicant and notify sales@plasmaberry.com as configured.
- Implement server-side validation, spam protection, upload type/size limits, malware scanning, access controls, secure storage and retention/deletion rules.
- Link the privacy-consent wording to Plasmaberry's approved privacy notice before publication.
- Configure an accessible confirmation/error page and protect the endpoint against spam and cross-site request forgery.
- Do not request bank statements or identity documents at initial registration unless there is a justified, approved need.

Important platform distinction: Solvigil is the underlying digital platform used by Plasmaberry for service visibility. It is not presented in this form as a standalone product or service offering.
